

SIMMONS®

The first name in electronic drums.

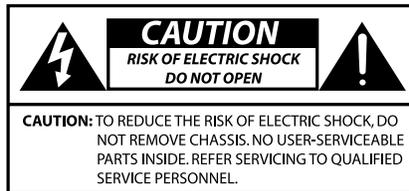

SD500 ELECTRONIC DRUM KIT

OWNER'S MANUAL

www.SimmonsDrums.net

SAFETY INSTRUCTIONS

AVIS: RISQUE DE CHOC ELECTRIQUE-NE PAS OUVRIR.

THE LIGHTNING FLASH WITH ARROWHEAD SYMBOL WITHIN AN EQUILATERAL TRIANGLE IS INTENDED TO ALERT THE USER TO THE PRESENCE OF UNINSULATED DANGEROUS VOLTAGE WITHIN THE PRODUCT'S ENCLOSURE THAT MAY BE OF SUFFICIENT MAGNITUDE TO CONSTITUTE A RISK OF ELECTRIC SHOCK TO PERSONS.

THE EXCLAMATION POINT WITHIN AN EQUILATERAL TRIANGLE IS INTENDED TO ALERT THE USER TO THE PRESENCE OF IMPORTANT OPERATING AND MAINTENANCE(SERVICING) INSTRUCTIONS IN THE LITERATURE ACCOMPANYING THE PRODUCT.

APPARATUS SHALL NOT BE EXPOSED TO DRIPPING OR SPLASHING AND THAT NO OBJECTS FILLED WITH LIQUIDS, SUCH AS VASES, SHALL BE PLACED ON THE APPARATUS.

- 1) Read these instructions.
- 2) Keep these instructions.
- 3) Heed all warnings.
- 4) Follow all instructions.
- 5) Do not use this apparatus near water.
- 6) Clean only with dry cloth.
- 7) Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- 8) Do not install near the heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- 9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety, if the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- 10) Protect the power cord from being walked on or pinched particularly at plugs convenience receptacles, and the point where they exit from the apparatus.
- 11) Only use attachments/accessories specified by the manufacturer.
- 12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over (Figure 1).
- 13) Unplug this apparatus during lightning storms or when unused for a long periods of time.
- 14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

Figure 1

WARNING: To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture. **CAUTION:** Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.

CAUTION: Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.

CONGRATULATIONS!

...on your purchase of Simmons' **SD500 Electronic Drum Kit**. To get the most enjoyment from this kit, we recommend that you skim through this manual at least once, then refer back to it to learn more about specific functions.

Caring for Your SD500 Electronic Drum Set

Location

- Keep the drum kit away from direct sunlight, high temperature sources, and excessive humidity to prevent deformation, discoloration, or more serious damage.

Power Supply

- Turn the power switch OFF when the SD500 is not in use.
- The AC adapter should be unplugged from the AC outlet if the SD500 is not to be used for an extended period of time.
- Avoid plugging the AC adapter into an AC outlet that is also powering high-consumption appliances such as electric heaters or televisions. Also avoid using multi-plug adapters, since these can reduce sound quality, cause operation errors, and result in possible damage.
- To avoid damaging the unit, turn the SD500 and all related devices OFF prior to connecting or disconnecting cables.

Handling and Transport

- Never apply excessive force to controls, connectors, and other parts.
- Unplug cables by gripping the plug firmly. Do not pull on the cable.
- Disconnect all cables before moving the module.
- Physical shocks caused by dropping, bumping, or placing heavy objects on the module can result in scratches and more serious damage.

Cleaning

- Clean the module with a dry, soft cloth.
- A slightly damp cloth may be used to remove stubborn grime and dirt.
- Never use cleaners such as alcohol or thinner.
- To avoid discoloration, do not place vinyl objects on top of module.

Electrical Interference

- The module contains digital circuitry and may cause interference if placed too close to radio or television receivers. If this occurs, move the SD500 further away from the affected equipment.

Service and Modification

- There are no user serviceable parts in the drum module.
- Do not attempt to open the sound module or make any change in the circuits or parts of the unit. This would void the warranty.

Made in China 1407-10156

FEATURES

New Features of the SD500 Kit

- Custom Sound Library. Completely new sample set based on the most popular classic and modern kits.
- Variable Attack Response. Significantly improved playback with dynamic response according to hit velocity, combined with alternating sample playback by velocity zone.
- S500 Series Pads with increased sensitivity and greater isolation for multi-zone snare pad.

SD500 Sound Module General Features

Polyphony

Voices - 64

Sounds

Drum Voices - 328
Keyboard Voice-43
Drum Kits - 25 Preset / 10 User
Songs - 50 Preset / 10 User

Effects

Reverb - Hall1, Hall2, Room1, Room2, Room3, Stage1, Stage2,
Plate, Delay, Echo, Off.
Chorus - Chorus1, Chorus2, Chorus3, Chorus4, Feedback,
Flanger, Short Delay, Flanger2, Flanger3, Celeste1, Celeste2,
Celeste3, Off.

Trigger Inputs

1 x Kick, Single Zone
1 x Snare, Dual Zone
9" Dual zone Snare pad
8" Single zone Tom pads
10" Single zone Hi Hat pad
10" Single zone Crash Cymbal pad with Choke
12" Single zone Ride Cymbal pad
1 x Hi-Hat pedal

Hardware

Drum Rack and mounts
Kick pedal / Trigger module
9" Dual zone Snare pad
8" Single zone Tom pads
10" Single zone Hi Hat pad
10" Single zone Crash Cymbal pad with Choke
12" Single zone Ride Cymbal pad
1 x Hi-Hat pedal

External Connections

1/8" Headphone Output
2 1/4" Master Outputs
1/8" TRS Aux input
USB Connection for MIDI via computer

Sequencer

Preset Songs - 25
User Songs - 10
Tempo- 20-280 BPM
Click/Metronome- Click voice, Time Signature, Tempo,
Interval, Volume

Power: 9v, 600ma

Weight: 37.04 lbs / 16.8 kg

CONNECTIONS

Connecting the Sound Module and Pads

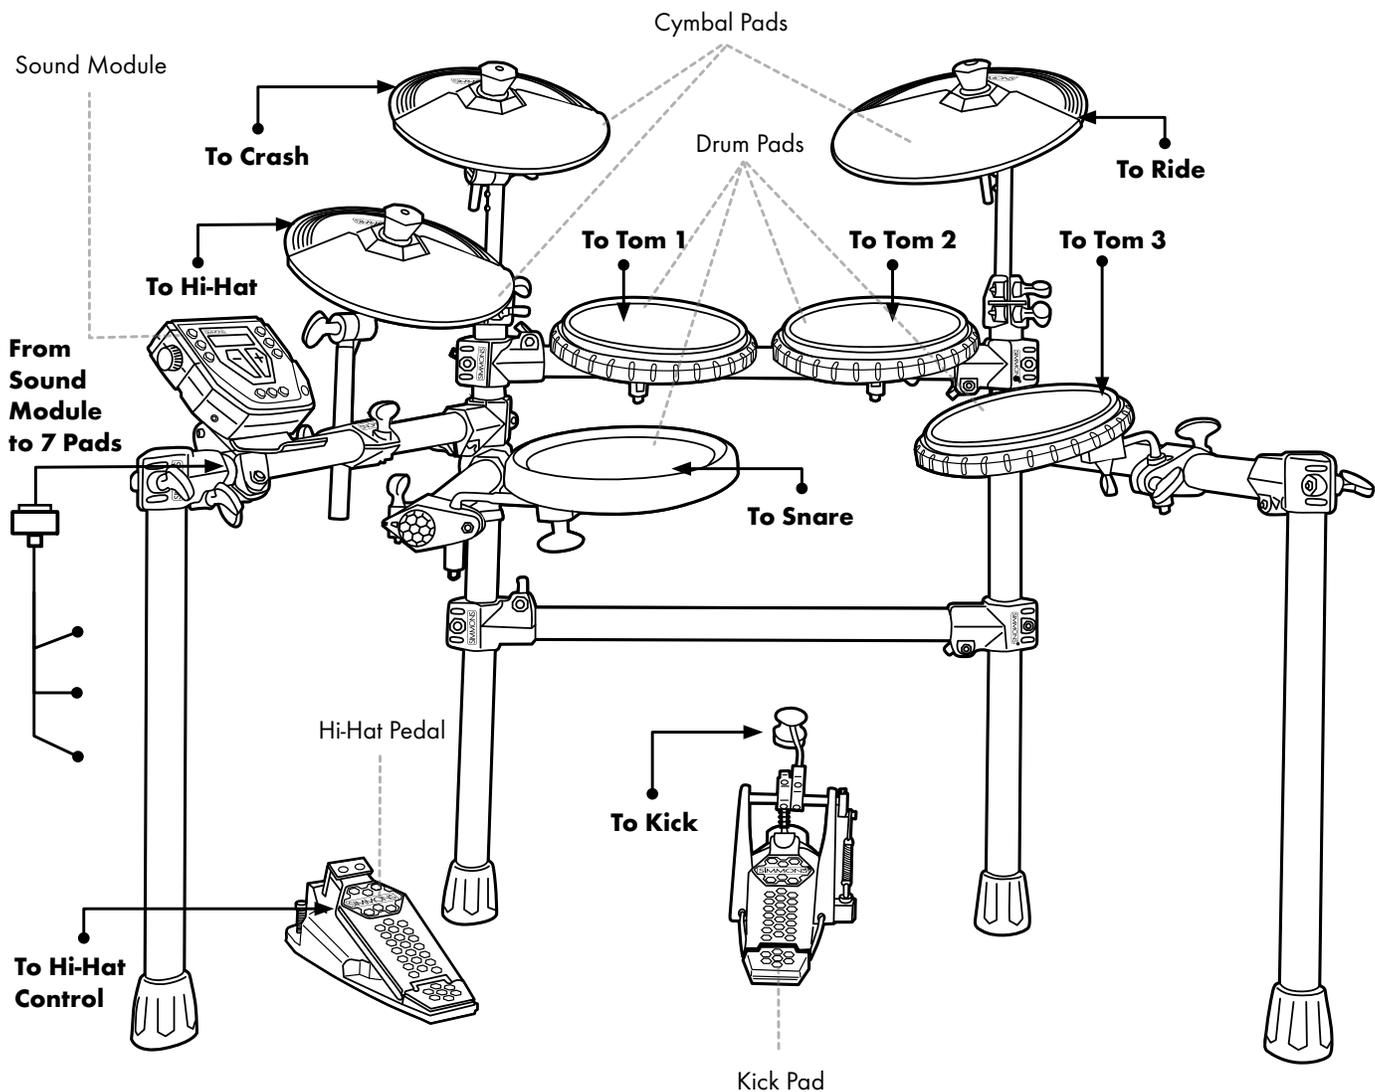

CAUTION!

To prevent electric shock and damage to the device, make sure the power is switched OFF on the sound module and all related devices before making any connection.

Using the provided cables, connect the 1/4" jacks to the corresponding drum pads, cymbal pads and kick pad. The pin connection will attach to the multi-pin connector serial port on the bottom of the sound module. (See illustration below.)

The voice of the hi-hat pad is controlled by the hi-hat pedal. Plug into the Hi-Hat pedal the plug that is labelled "Hi-Hat Control". Similar to a real drum kit, the hi-hat pad functions as an 'open hi-hat' when the pedal is released. When the pedal is pressed down, it functions as a 'closed hi-hat'.

*See Appendix for Pad, Triggers, Name and MIDI chart.

ASSEMBLING YOUR KIT

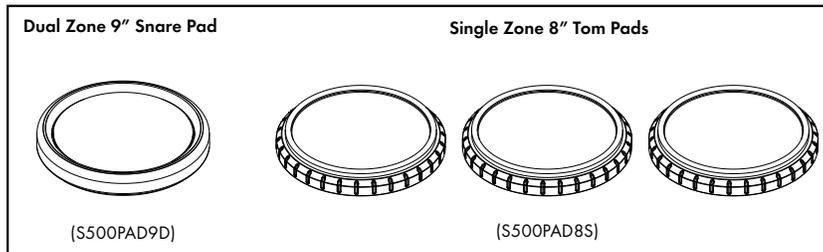

Inside this package

Before assembly, please make sure that all the items listed below are present.

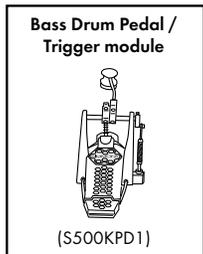

Cymbals

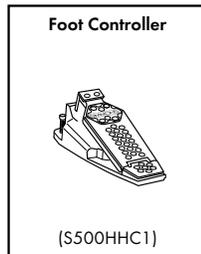

Drum Pads

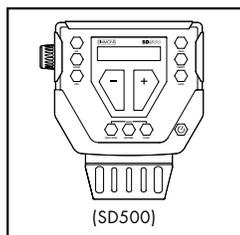

Kick Pad

Hi-Hat Pedal

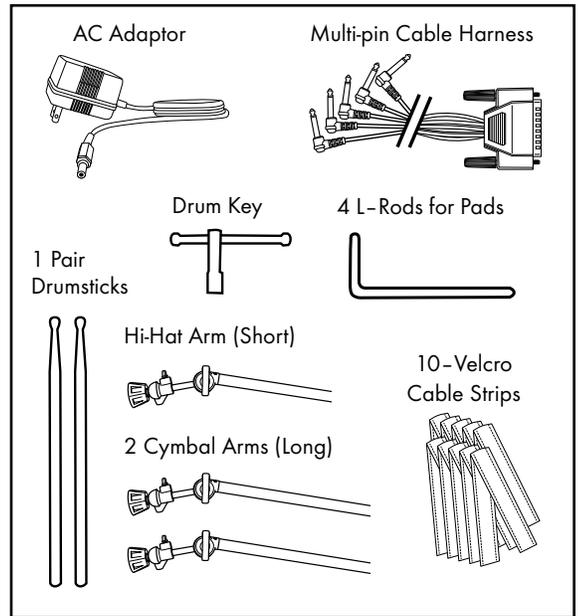

Drum Module

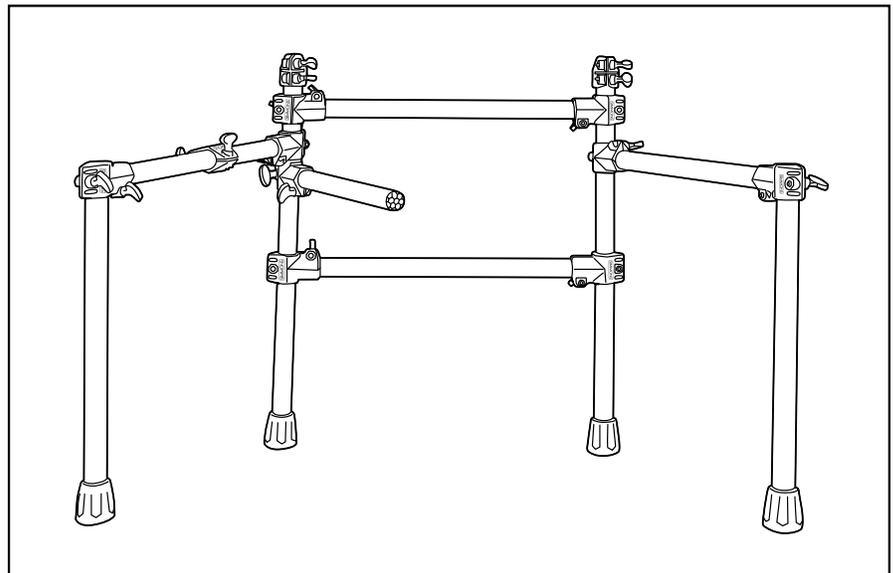

User Manual

Accessories

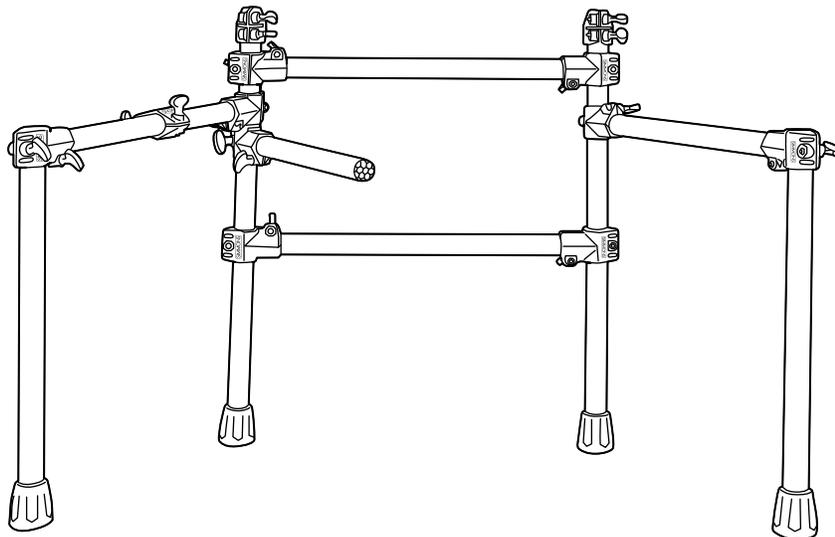

Drum Rack

ASSEMBLING YOUR KIT

The SD500 Drum Rack comes preassembled with all clamps already in place.

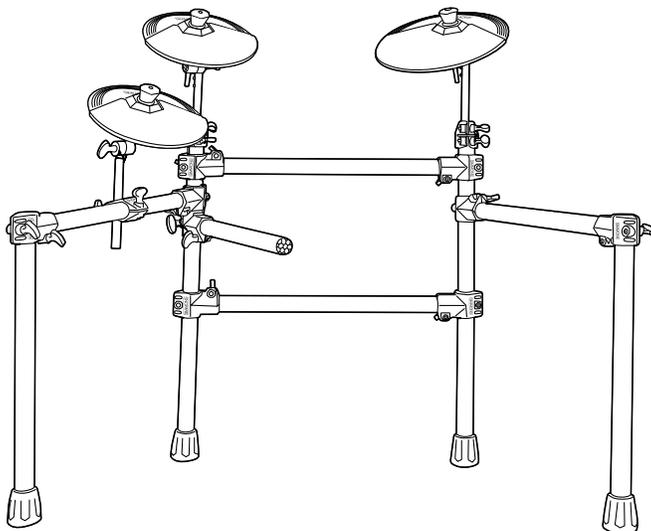

1. Pull rack out of box.
2. Loosen wing nuts on side arms and snare clamps so you can rotate bars.
3. Pull the side arms and snare arm out into their playing positions.
4. Tighten wing nuts on side arm clamps.
5. Loosen L-rod wing nuts on tom clamps. Insert textured plastic of L-rod into tom clamps and tighten wing nuts.
6. Loosen wing nuts on pads.
7. Attach pads to L-rods and tighten wing nut on Tom Pads.

ASSEMBLING YOUR KIT

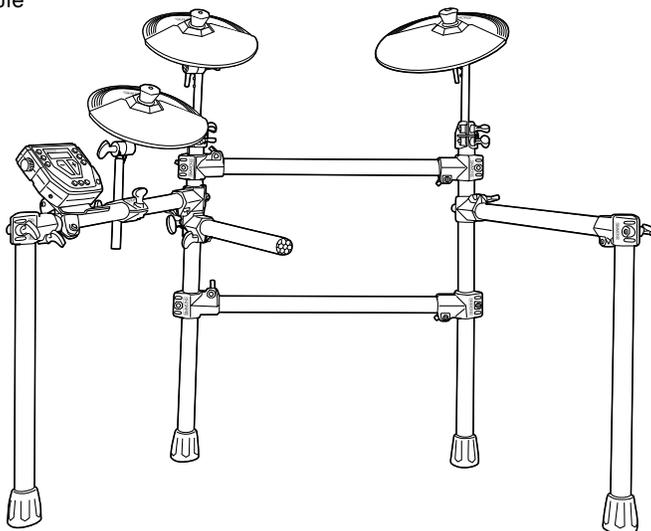

Attaching the Cymbal Pads

1. Insert each cymbal arm into the rack clamp.
2. Insert short hi-hat arm on the left-side arm's cymbal clamp.
3. Remove wing nut from cymbal tilter. Place cymbal pad on tilter assembly.
4. Re-attach washer and wing nut. Tighten wing nut.

Attaching the drum module

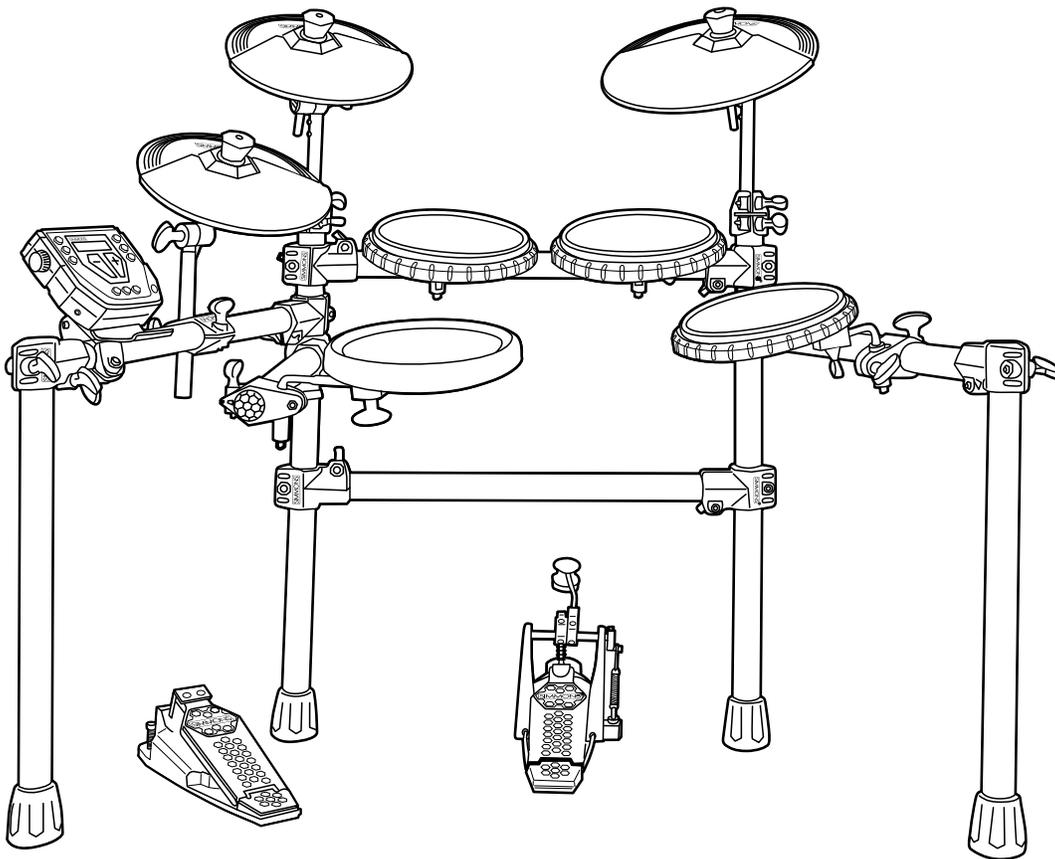

1. Loosen wing screw on drum rack.
2. Place drum module into drum clamp.
3. Tighten wing screw to secure module

ASSEMBLING YOUR KIT

Bass drum, hi-hat pedal and pad connections

1. Place the hi-hat pedal on the floor and to the left, as illustrated below.
2. Connect the marked cables from the pads to their corresponding inputs on the drum module
3. Place the bass pedal on the floor in the center of the rack as illustrated.

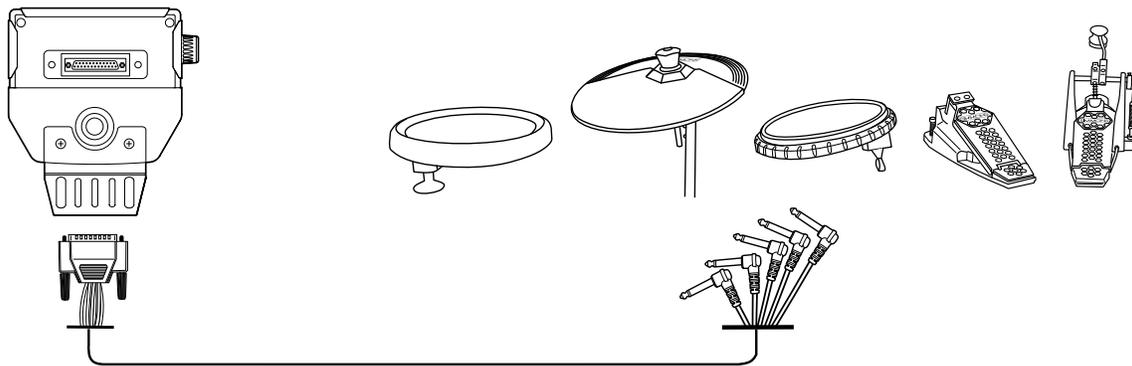

CONNECTIONS

Connecting the Module and Pads

Using the provided cables, connect the 1/4" jacks to the corresponding drum pads, cymbal pads and kick pad. The pin connection will attach to the serial port of the sound module. (See illustration.)

NOTE: The voice of the hi-hat pad is controlled by the hi-hat pedal. Similar to a real drum kit, the hi-hat pad functions as an 'open hi-hat' when the pedal is released. When the pedal is pressed down, it functions as a 'closed hi-hat'. Use cable strips to retain cable to rack.

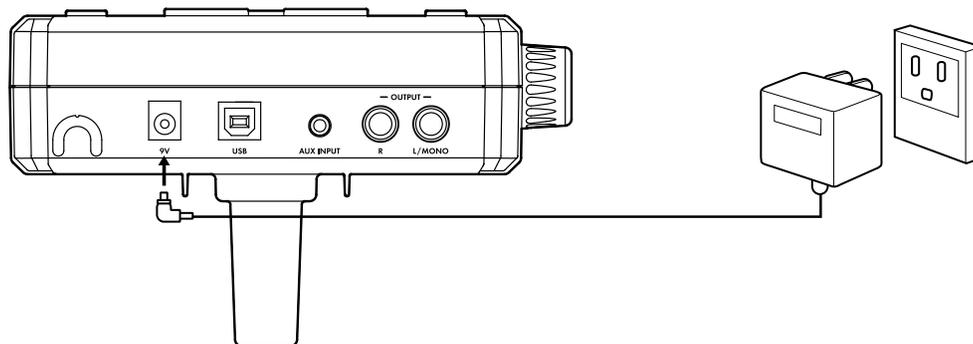

AC Adapter

The SD500 module uses an external power supply called an AC Adapter. This plugs into the back of the module.

Make sure the power is switched OFF on the module and connect the power adaptor with the DC IN jack on the rear panel.

NOTE: To protect the speakers, amplifier and the drum module from damage, lower the volume to the minimum level before switching the power ON.

Make sure the power is switched OFF when connecting the drum module with external devices.

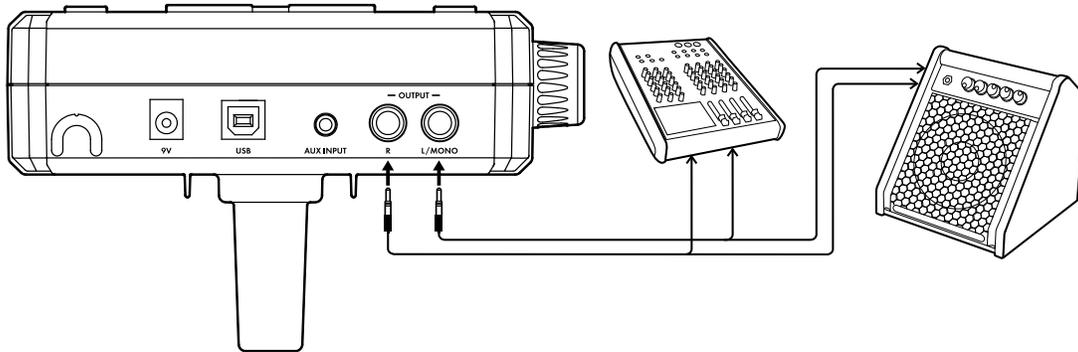

CONNECTIONS

Connecting Audio Equipment

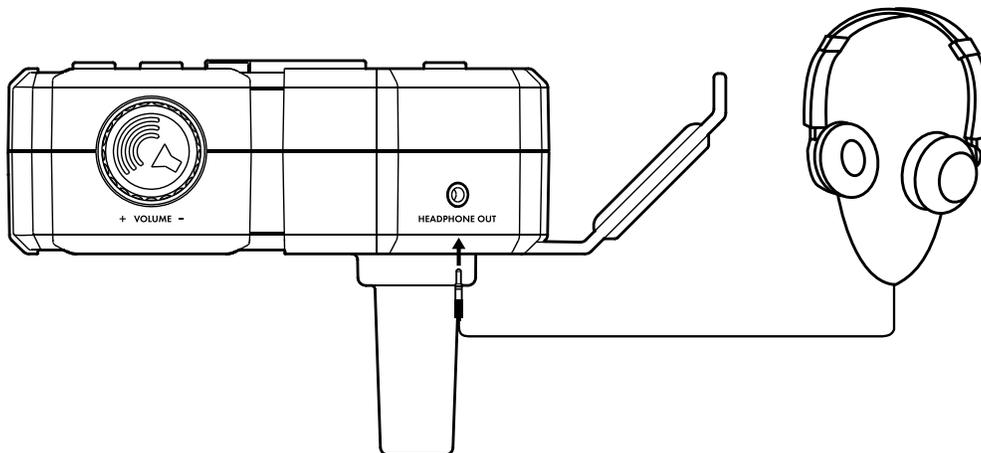

Mixers and Amplifiers

1. When you want to listen to the voices send the drum to a mixer or amplifier. Connect using the Output L/MONO and R jacks on the rear panel (for monaural playback, use the L/MONO jack; for stereo playback, connect both L/MONO and R jacks.)

2. The volume from the module is adjusted with the VOLUME knob.

You can connect a standard pair of headphones the SD500 module to listen to your electronic drum set without disturbing others. Connect the headphones to the headphone jack located on the side panel of the drum module. Adjust the volume to a comfortable level to avoid damaging your hearing. The Headphone output is separate from the Master Volume output control knob.

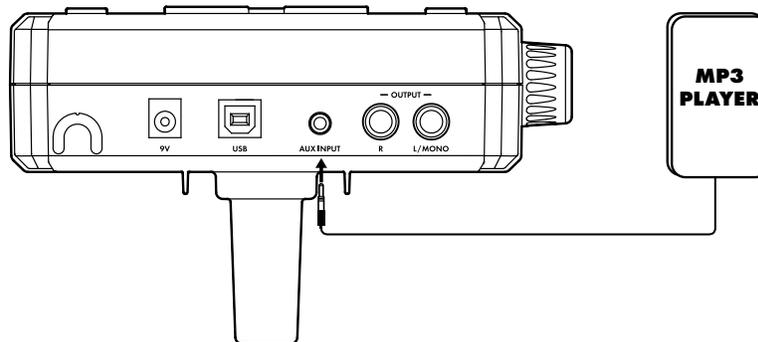

CONNECTIONS

AUX Input

This input allows you to mix the input from the external audio along with the SD500 module's internal sounds.

1. Plug the audio output of MP3 player, or other audio source into the AUX IN jack on the back panel.

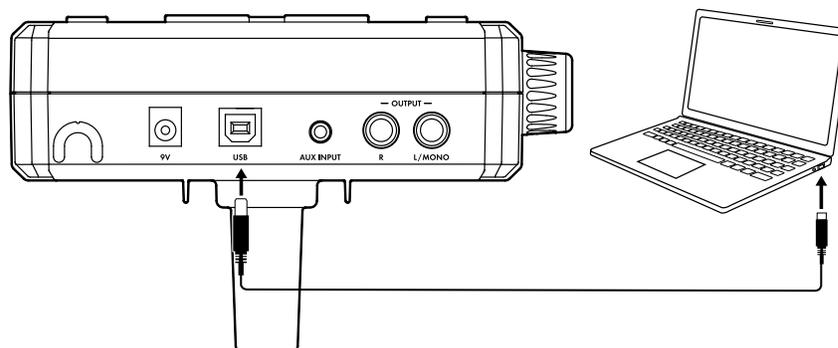

Connecting MIDI Devices and Computers

MIDI stands for Musical Instrument Digital Interface, which is a world-wide standard communication interface that enables electronic musical instruments and computers (of all brands) to communicate with each other. MIDI sends note and other communication between devices. This exchange of information makes it possible to create a system of MIDI instruments and devices that offer greater versatility and control than is available with isolated instruments. Whether you interface with computers, sequencers, expanders or other controllers, your musical horizons will be greatly enhanced.

MIDI USB connection

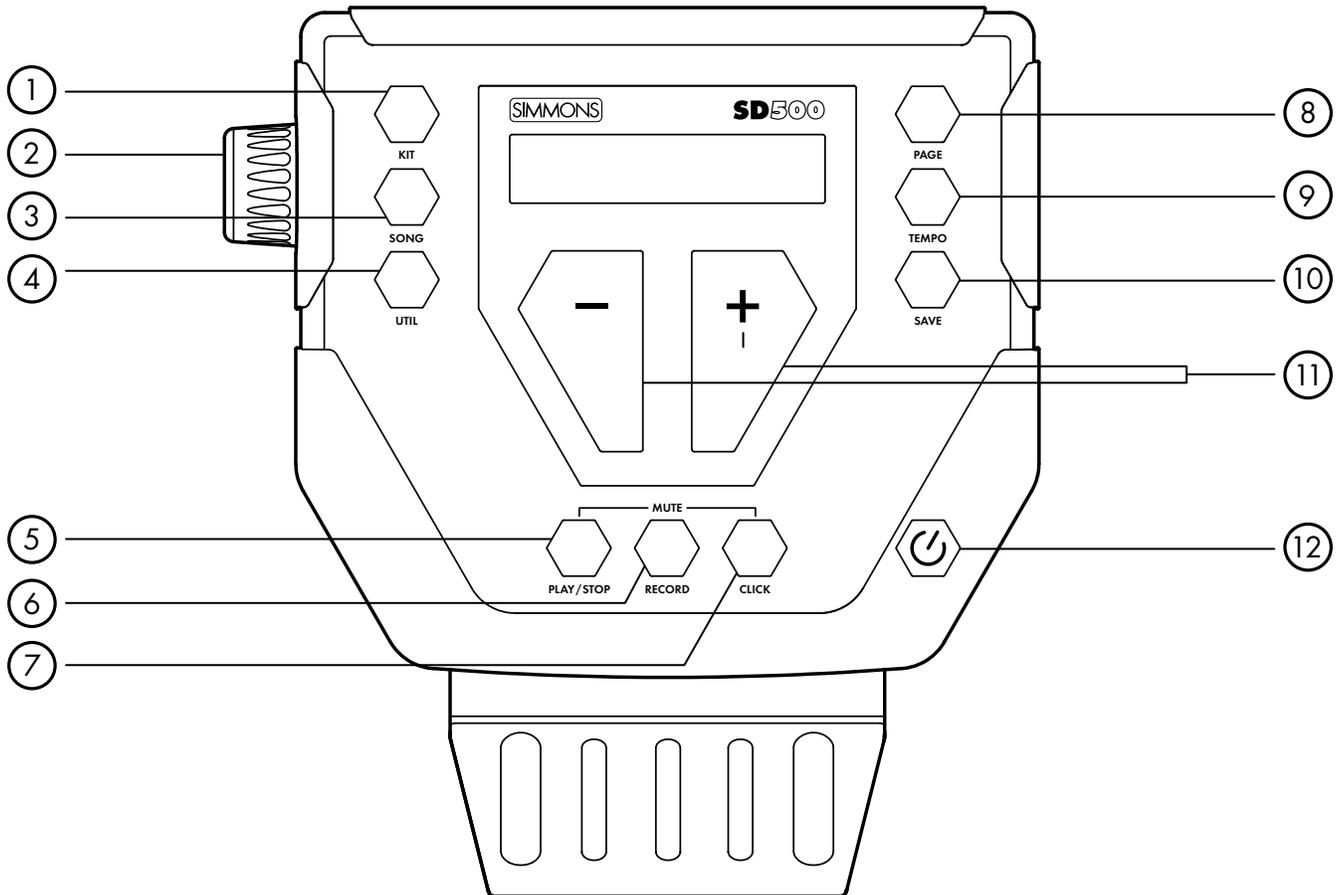

The USB connector allows you to connect the module directly to your computer. It can be connected without driver installation under the Windows & MAC OSX environment. The module will be recognized to receive and transmit MIDI messages through a single USB cable, USB is used only for MIDI messages (MIDI via USB). The SD500 module will appear as "SD500" in the USB device options of your software.

NOTE: When the USB is connected to a computer, all MIDI messages will be received and transmitted via USB.

SD500 DRUM MODULE OPERATION

Top Panel

① **Kit Knob**

② **Volume Button**

③ **Song Button**
Access Song Mode

④ **Utility Button**
Access Utility Functions

⑤ **Play/Stop Button**

Move through the Editing pages after each button push

⑨ **Tempo**
Adjusts tempo

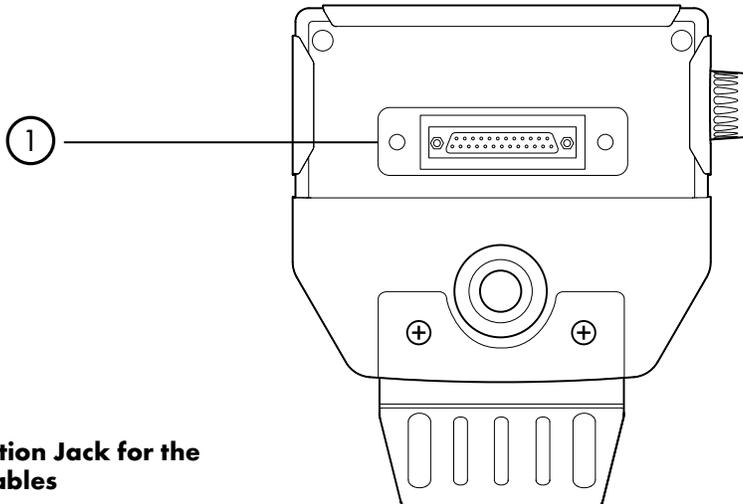

⑩ **Save**
Enters the Save menu when it is available

⑪ **+/- Buttons**
Adjust the current parameter on the screen

⑫ **Power Switch**
This is a soft switch. To turn off, press and hold the button for 5 secs.

SD500 DRUM MODULE OPERATION

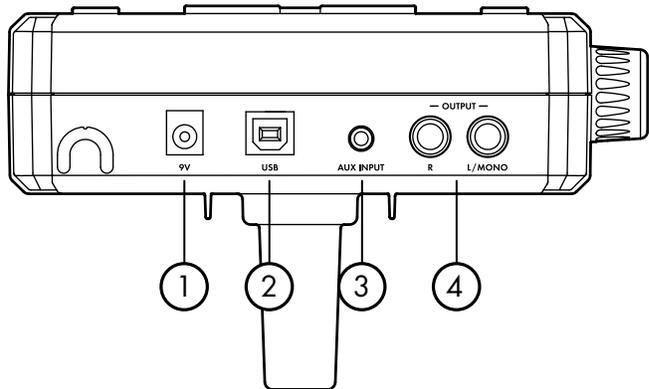

Bottom Panel

- ① **Serial Connection Jack for the pad trigger cables**

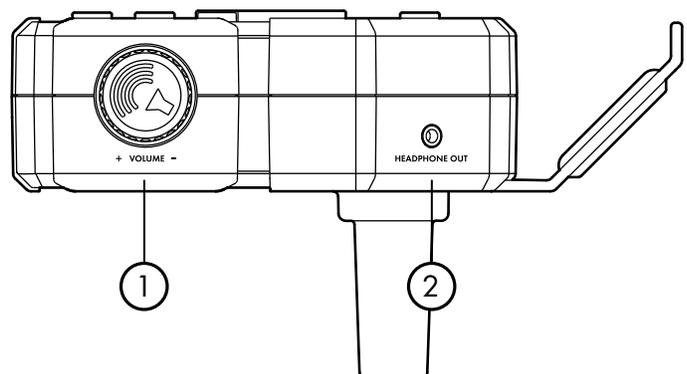

Back Panel

- ① **AC Adapter Input**
Connection for the 9V DC power adapter
- ② **USB Port**
Used for connecting the SD500 module to a computer.
- ③ **AUX Input**
Stereo 1/8" jack to connect CD or MP3 players to the module.
- ④ **Output**
Stereo audio outputs to connect to external audio sources

Side Panel

- ① **Volume knob**
- ② **1/8" TRS headphone jack**

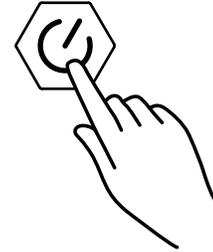

QUICK START OPERATIONS

Turning the Power on the Module

1. Connect the AC Adapter to the drum module.
2. Press the power switch on the top panel to turn on the module.

NOTE: There is an automatic power off function that turns off the module when the kit is not being used for a certain period of time. The default setting is off. If this gets changed you can reset this in the Utility mode.

SIMMONS

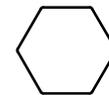

SD500

K01:Maple

Basic Operation and Navigation

Selecting Modes

There are 3 main modes for the module KIT, SONG and UTILITY. To enter these modes press the corresponding buttons on the top panel of the module.

KIT

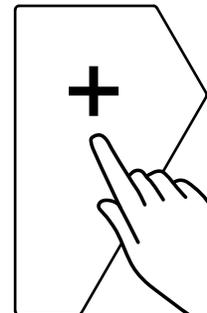

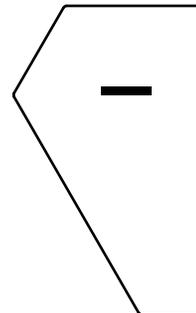

SONG

UTIL

Adjusting Values

1. Select the parameter to be adjusted.
2. Adjust the value using + / - buttons.

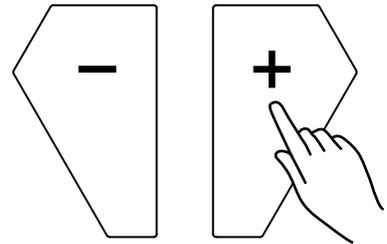

QUICK START OPERATIONS

Listening to the Demo Songs

The demo songs help to show you the capabilities and sounds of the SD500 module. There are two demos in the module. The first demo song is an extended drum solo that switches between various kits in the module. The second demo sound plays a long song that has several patterns combined to show the different genres of music that module can play.

1. Press KIT and SONG button simultaneously to enter Demo Mode. The first song demo will start playing.
2. Press the PLAY/STOP button to stop the demo.
3. Press the + or - buttons to select a Demo to play; use Play button to play the demos
4. After pressing STOP, press any of the Mode buttons (KIT, SONG or UTILITY) to exit the Demo Mode

SIMMONS

SD500

Demo: 1

Selecting a Kit

Entering KIT Mode

1. Press the KIT button. The LCD displays the current Kit number and Kit name.
2. Press the - /+ buttons (Preset or User Kits).

Selecting a Song

1. Press the SONG button and the SONG screen appears with Song Number and Name.
2. Press the -/+ buttons to select the song you want to play.

Playing Song

1. Press PLAY/STOP to play a song.
2. Press the PLAY/STOP button to stop playback of the song.

NOTE: You can temporarily change the tempo of a song while playback is in progress. The song returns to its preset tempo when a different song is selected.

Muting the Drum Part

1. While a Song is playing press the PLAY/STOP and CLICK Button at the same time. This will mute the drum sound. The screen will show the mute status "Mute On" or "Mute Off"
2. To unmute the Drums press the PLAY/STOP and CLICK Buttons at the same time again.
3. The default setting is to mute the drum sound. It also mutes the accompaniments track. See P.21 "Mute Select".

KIT MODE - ADVANCED

Editing a Kit

1. Press the KIT button.
2. Press the PAGE button to see the screen for the current sound
3. Strike a drum pad to view the Voice currently assigned
4. Press the PAGE button to move to the first parameter to be changed on the current sound. Press the PAGE button repeatedly to step through all the available parameters that can be changed on the voice.
5. Press the -/+ buttons to change the parameter
6. Press the SAVE/ENTER button to save the assignment to a User Kit.
(See Saving a kit)

Parameter	Definition	Parameter Range[-/+]
voice	Voice index	0-328
volume	volume	0-32
Pitch	Pitch	-8 ~ +8
Decay	Decay	0 ~ -5
Pan	Pan	L8 ~ R8/ Center
R.LVL	Reverb Level	0 ~ 32
C.LVL	Chorus Level	0 ~ 32

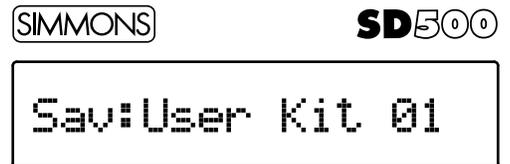

KIT MODE - ADVANCED

Renaming a Kit

1. Select a User Kit. (Preset Kits cannot not be renamed)
2. Press the -/+ buttons to choose the User kit for save.
3. Press the SAVE/ENTER button to rename the User Kit.
4. Press the PAGE button to move the cursor
5. Press [+/-] to change the character
6. Press the SAVE/ENTER confirmation

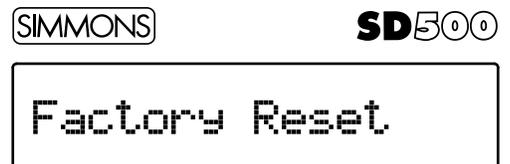

Saving a Kit

1. Press the SAVE/ENTER button to save the assignment to a User Kit.
2. Press the -/+ buttons to choose the User kit for save.
3. Press the SAVE/ENTER button to rename the User Kit.
4. Press the PAGE button to move the cursor
5. Press [+/-] to change the character
6. Press the SAVE/ENTER confirmation

Kit Reset

1. Select a Kit
2. Press the Page Button until you see Factory Reset.
3. Press the Save Button. The screen will show "Current Kit"
4. Press Save to reset just the one kit. If you want to reset all the kits go to the next step.
5. Press the + button. The screen will show "All Kits".
6. Press Save.

SONG MODE

Playing a Song

1. Press PLAY/STOP to play a song.
2. Press the PLAY/STOP button to stop playback of the song.

NOTE: You can temporarily change the tempo of a song while playback is in progress. The song returns to its preset tempo when a different song is selected.

SIMMONS

SD500

S01:Bonz beat

Muting the Drum Part

1. While a Song is playing press the PLAY/STOP and CLICK Button at the same time. This will mute the drum sound.
2. To unmute the Drums press the PLAY/STOP and CLICK Buttons at the same time again.

Editing a Song

1. Press the SONG Button. The current song will be displayed.
2. If you wish to change to another song press the -/+ buttons until you get to the Song you want to edit.
3. From the Song you have selected press the PAGE button. The first selection is the Accompaniment Volume (Acc Vol).
4. Press the -/+ buttons to set the value for the volume. To move to the next parameter press the PAGE button. Each time you press the PAGE button you will come to the next parameter. See the list below of the parameters for Songs.

- Acc Volume
- Drum Volume
- Mute Select: Part Mute - Drums or Accompaniment
- Kit Link: Kit follows the song changes
- Erase Track - Erase Drums or Accompaniment track (only user song)

Copy Song

You can copy Preset song to user song, then erase Drums or Accompaniment track, Re-Recording.

1. Select a Song.
2. Press the SAVE/ENTER button to save the to a User song
3. Press the -/+ buttons to choose the User song for save
4. Press the SAVE/ENTER button to rename the User song.
5. Press the PAGE button to move the cursor
6. Press [+/-] to change the character
7. Press the SAVE/ENTER confirmation

If you want to rename user song, song save to the original position, then use the rename instructions.

SIMMONS

SD500

RECORDING A SONG

Recording Settings

There are several settings for the Record mode. To enter the setup mode press the RECORD and PAGE buttons.

1. The first page is the Track you wish to record to. The default is Drum. The other setting is Acc (accompaniment).

To change between these Press the -/+ buttons.

To record an accompaniment track you must use an external MIDI device such as MIDI keyboard that is connected to your computer to the USB input.

Accompaniment track: To record these parts you will need an external MIDI keyboard or MIDI device that can output MIDI notes on MIDI channels 11-16.

Channel 11: Percussion Part

Channel 12-16: Accompaniment Part

2. The next Page is Together.

If on, other track will play together with recording.

3. The next Page is Syn Start.

This determines if you want the recorder to start recording when you first play a note, rather than waiting for a count-in. When you press the Record button the metronome will play and the recorder will not start until you play.

4. The next page is Pre Count.

This determines the amount of measures you want to wait before recording. If Syn Start is on. This will be ignored. Press the -/+ buttons to change the parameter setting between 0-2 bars

SIMMONS

SD500

Record Trk: Drum

Record Trk: Acc

Together: On

Syn Start: Off

Pre Count: 2 Bar

RECORDING A SONG

To Record

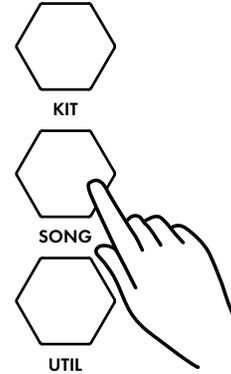

1. Press the Song Button

2. Select a User Song

3. Press the Record button.

You will hear the Click metronome sound count in. Begin playing the song after the count off.

4. After you record your song you can also rename the song, Press SAVE/ENTER button to save and rename.

Click Settings

The CLICK is the metronome sound that is played when you are listening to beat to play along with.

Press CLICK button on/off metronome.

1. To edit the Click settings press and hold the CLICK button for 2 seconds, then press the PAGE button.

The first parameter is the time signature- "T Sig".

3. Press the +/- buttons to select the time signature that you want.

4. To get to the next parameter press the PAGE button. See the list below of the parameters for the Click.

SIMMONS

SD500

Time Sig: 4/4

Definitions

Time Signature- Time Signature / T-Sig- For the preset songs, this parameter shows the current song's default value. For the user songs that have material already recording on them the default value is 4/4 and cannot be changed.
Interval- The refers to the note value interval for the click. Ex quarter note, eight note etc.
Click Voice- This refers to the sound for the Click
Click Vol- Click Volume
Reset- Resets the Click to the factory setup

UTILITY MODE

Utility Mode Settings

The Utility mode is for the main functions of the module such as trigger setup for the pads, effects, MIDI setup and saving global settings.

Trigger Settings

You can set the parameters of each drum and cymbals pad in the Trigger menu. While editing the settings, you can select each trigger by hitting the corresponding trigger pad.

1. Press the UTILITY button.
2. Press the PAGE button to see the screen for the current trigger pad. The default is the Snare pad center Sensitivity.
3. Strike the drum pad you want to edit to view the setting currently assigned
4. Press the -/+ buttons to change the parameter setting.
5. To get to the next parameter press the PAGE button. See the list below for the other parameters and explanations.

SIMMONS

SD500

Sensitive: 16 SN

Parameter definitions

Sensitivity

This adjusts the sensitivity of the pad trigger to control the pad response. Higher settings result in higher sensitivity, so that the pad will produce a loud volume even when struck softly. Having the sensitivity set too high can affect the dynamics of the pad.

Retrig-C (Retrigger cancel)

Retrigger Cancel prevents retriggering from occurring. Although setting this to a high value prevents retriggering, it then becomes easy for sounds to be omitted when the drums played fast (roll etc.). Set this to the lowest value possible while still ensuring that there is no retriggering.

Threshold

This setting allows a trigger signal to be received only when the pad is struck harder than a specified force. This can be used to prevent a pad from sounding in response to peripheral vibrations from another pad.

Curve (Trigger curve)

This setting allows you to control the relation between the velocity (striking force) and changes in volume (the dynamic curve.) Adjust this curve until the response feels as natural as possible.

X-Talk (Pad Crosstalk)

When two pads are mounted on the same stand, the vibration produced by hitting one pad may trigger the sound from another pad unintentionally (This is called crosstalk.) You can avoid this problem by adjusting Crosstalk Cancel on the pad that is sounding inadvertently. If the value is set too high, then when two pads are played simultaneously, the one that is struck less forcefully will not sound. Be careful when setting this parameter to the minimum value required to prevent crosstalk.

UTILITY MODE

Effects

The SD500 module has built-in Reverb and Chorus which are adjustable in the Utility Effects setup.

1. Press the UTILITY button. The first parameter is for the trigger settings.
2. Press the PAGE button until you see the screen for Reverb type
3. Press the -/+ buttons to change the parameter setting.
4. Press the PAGE button again to go to the screen for the Chorus type
5. Press the -/+ buttons to change the parameter setting.

The available parameters are available below:

Reverb

Hall 1, Hall2, Room 1, Room2, Room3, Stage 1, Stage2, Plate, Delay, Echo, Off.

Chorus

Chorus 1, Chorus2, Chorus3, Chorus4, Feedback, Flanger, Short Delay, Flanger2, Flanger3, Celeste 1, Celeste2, Celeste3, Off.

MIDI Settings

The SD500 module is a USB MIDI compatible device. There are no special drivers required to use the module with your computer.

Local - When local is on the front panel buttons and the external MIDI device sends MIDI data. In some cases you may want to turn off the front and remotely send MIDI commands. In this case set the Local to Off. The default setting is set to ON.

To change the Local On/Off.

1. Press the UTILITY button.
2. Press the PAGE button until you see the screen for MIDI Local "On"
3. Press the -/+ buttons to change the parameter setting.

SIMMONS

SD500

Local Sw: On

UTILITY MODE

Pad MIDI Note assignments

The MIDI output notes from the SD500 are preset in the Module. The following list has the MIDI notes that are sent from the module when the drum pads and pedals are played.

MIDI Note	Pad
36	Kick
38	Snare - Center
40	Snare - Rim
48	Tom 1
45	Tom 2
43	Tom 3
46	Hi Hat- Open
42	Hi Hat - Closed
44	Hi Hat - Pedal
49	Crash
51	Ride

For more details on MIDI functionality please see the MIDI Implementation Chart in the Appendix section of the manual.

Auto Power Mode

Auto Close

On: If you don't use SD500 exceeding 30 min. It will Automatically shutdown the module.

Off: The module will not shutdown Automatically. (default setting)

UTILITY MODE

Factory Reset

There may be occasions where you want the module to return to the factory settings. This function will return the module back to factory setup.

To Reset the Module to Factory Setup

1. Press the UTILITY button.
2. Press the PAGE button until you see the screen for "Util Reset"*
3. Press the SAVE button to reset the module.
The module will go through the reset procedure and afterwards return to the Kit mode screen.

* There are two types of resets. Utility reset just resets the module settings. Reset All will reset all the sounds as well as the module settings. (Press PAGE button again to Reset All.)

SIMMONS

SD500

Util Reset

Tempo

To adjust tempo press the TEMPO button. The current tempo will be displayed.

You can adjust the tempo with the -/+ buttons. You can also change the tempo by tapping on the drum pads. To do this press the SAVE/ENTER button. The screen will show "Tap.." to indicate the module can accept your tempo input from the drum pads.

Tempo: 107
