

POP-TO-ROCK TITAN PACK MANUAL

The Pop-to-Rock Titan Pack is a free download to change the sound of your Titan 50 drum module. Loading the Pop-to-Rock Titan Pack completely replaces the built-in kits with a new set of drum sounds. The new kits are in the style of modern pop, R&B, and rock.

If you want to go back to the original sound set on the Titan 50, you can do so at any time. Just download the Top 25 Titan Pack from the Simmons website at simmonsdrums.net

Note: This update will delete any user kits you have made, because it's a completely new set of sounds. Be sure to back up your kits if you need to.

INSTALLATION

To install the Pop-to-Rock Titan Pack:

1. Download the Titan Pack and Simmons Firmware Updater, both on the Simmons website downloads page.
2. Connect a USB cable from your macOS or Windows computer to the module.
3. Launch Simmons Firmware Updater. You should see "Module Connected" at the top of the screen. (If you don't see that message then unplug your power cable, reconnect it, then power it on and relaunch the program.)
4. Select Titan 50 from the dropdown menu. Click the Browse button and select the Titan Pack you downloaded.
5. Click Update. The firmware updater will display the current firmware and sound ROM, as well as the version and sound ROM included in the update. The update takes about 10 minutes. Please do not put your computer to sleep or standby mode during this update. If possible, just set the cursor on the Firmware Updater window and don't use the computer during the update.
6. When the update is complete, the software will instruct you to unplug the module's power cable, reconnect it, then power it on while holding + and -
