

## TOP 25 TITAN PACK MANUAL

The Top 25 Titan Pack includes the preset kits that came with your Titan 50 drum module. If you have loaded one of our other Titan Packs and want to go back to the original sounds, this file allows you to do that. The Top 25 includes the best kits from each of the Titan Packs in a variety of musical styles.

Note: This update will delete any user kits you have made, because it's a completely new set of sounds. Be sure to back up your kits if you need to.

## INSTALLATION

To install the Top 25 Titan Pack:

1. Download the Titan Pack and Simmons Firmware Updater, both on the Simmons website downloads page.
2. Connect a USB cable from your macOS or Windows computer to the module.
3. Launch Simmons Firmware Updater. You should see "Module Connected" at the top of the screen. (If you don't see that message then unplug your power cable, reconnect it, then power it on and relaunch the program.)
4. Select Titan 50 from the dropdown menu. Click the Browse button and select the Titan Pack you downloaded.
5. Click Update. The firmware updater will display the current firmware and sound ROM, as well as the version and sound ROM included in the update. The update takes about 10 minutes. Please do not put your computer to sleep or standby mode during this update. If possible, just set the cursor on the Firmware Updater window and don't use the computer during the update.
6. When the update is complete, the software will instruct you to unplug the module's power cable, reconnect it, then power it on while holding + and -
