

## JAZZ-FUSION TITAN PACK

From the early days of jazz clubs to the latest fusion sounds, the Jazz-Fusion Titan Pack puts the full history of jazz in your Titan 50. Vintage '50s cymbals and kits were recorded in stereo with period-accurate mics for a traditional sound and feel. The collection includes brush drums and cymbals, alternative snares, cross-stick and more.

Note: This update will delete any user kits you have made, because it's a completely new set of sounds. Be sure to back up your kits if you need to.

## INSTALLATION

To install the Jazz-Fusion Titan Pack:

1. Download the Titan Pack and Simmons Firmware Updater, both on the Simmons website downloads page.
2. Connect a USB cable from your macOS or Windows computer to the module.
3. Launch Simmons Firmware Updater. You should see "Module Connected" at the top of the screen. (If you don't see that message then unplug your power cable, reconnect it, then power it on and relaunch the program.)
4. Select Titan 50 from the dropdown menu. Click the Browse button and select the Titan Pack you downloaded.
5. Click Update. The update takes about 10 minutes. Please do not put your computer to sleep or standby mode during this update. If possible, just set the cursor on the Firmware Updater window and don't use the computer during the update.
6. When the update is complete, the software will instruct you to unplug the module's power cable, reconnect it, then power it on while holding + and -
